

Schuylkill Township

CHESTER COUNTY

Spotted lanternfly is an invasive insect that has spread throughout southeastern Pennsylvania and surrounding states. Learn how to recognize spotted lanternfly and what you can do to help stop its spread. Join your neighbors at the township's November 8, 2018 seminar and help halt the invasion.

SEMINAR

STOP THE SPOTTED LANTERNFLY

Thursday, November 8, 2018
7:00 p.m.

Schuylkill Township Municipal Building
111 Valley Park Road, Phoenixville

SPEAKER: Peg Friese, Master Watershed Steward,
Penn State Extension

PennState Extension

sponsored by the Schuylkill Township Environmental Advisory Council

The Spotted Lanternfly (SLF), *Lycorma delicatula*, is a new invasive insect that has spread throughout southeastern Pennsylvania since its discovery in Berks County in 2014. SLF presents a significant threat to Pennsylvania agriculture, including the grape, tree fruit, hardwood and nursery industries, which collectively are worth nearly \$18 billion to the state's economy. At this meeting, you will learn more about this invasive pest, and how you can help control the impact to your community through the different stages of its life cycle.

For information on the spotted lanternfly, please visit <https://extension.psu.edu/spotted-lanternfly>

Schuylkill Township will make every effort to provide reasonable accommodation at township-sponsored events. Any person with a disability requiring special accommodation to attend a township-sponsored public meeting or event at Schuylkill Township should notify the Township Secretary at 610-933-5843 as early as possible, but no later than seven (7) working days prior to the event.
